

February 23, 2015

Transferred chemicals from inactive facility at 4242 Aldergrove road, Ferndale WA 98248 to Venoil at 9390 South March Point rd., Anacortes WA 98221

Venoil has operating steam boiler and active laboratory where the chemicals will be used in daily business activities.

The following chemicals are partial remaining volumes in specific volume containers.
Chemicals are all liquid unless specified as (powder)

Hydrazine 35%, two 5 gallon containers, used in boiler feed water oxygen scavenging.

Morpholine, two 5 gallon containers, used in condensate water treatment.

Polymer Dispersant, one 5 gallon container, used in boiler water treatment.

Disodium Phosphate, (powder) two 1 gallon containers, used in boiler water treatment.

Soda Ash, (powder) one 1 gallon container, used in boiler water treatment.

Phosphoric Acid, one 1 gallon container, used in biodiesel and glycerin lab research work.

Sulfuric Acid, one 1 gallon container, used in biodiesel and glycerin lab research work.

Denatured Ethanol, one 1 gallon container, used in laboratory titration.

Xylene, one 5 gallon container, used for bio oil moisture content determination

Water treatment testing chemicals-Variou liquid reagents in one pint containers or smaler

Another small volumes of Laboratory Chemicals removed from old laboratory trailer and moved to Venoil active laboratory

O-Xylene, one 1 gallon container

Propanol, two 1 gallon containers

Hydrochloric acid, one 1 gallon container

Potasium Nitrate, (powder) one 500 gram container

Sodium Carbonate, (powder) two 500gram containers

Silver Sulfate, (powder) one 500 gram container

Hexamethylenetetramine, (powder) one 500 gram container
